Enrollment should accurately record a member's project enrollment for the <u>current</u> 4-H Program Year. Previous years' project enrollments have been saved and are a part of the member's enrollment history.

1. Click [Edit] next to the project.	
2. To delete a project, click [Delete] - or - Edit the project as desired and click [Update]. The project will appear in the "Project List" once added. Ensure all desired projects for the year are included in the "Project List." Check with your local Extension office for project add/drop deadlines.
